

Noise Exposure Map Notice; Receipt of Noise Compatibility Program and Request for Review; Fort Worth Spinks Airport; Fort Worth, TX

AGENCY: Federal Aviation Administration.

ACTION: Notice.

SUMMARY: The Federal Aviation Administration (FAA) announces its determination that the noise exposure maps submitted by the City of Fort Worth, Texas for Fort Worth Spinks Airport under the provisions of Title I of the Aviation Safety and Noise Abatement Act of 1979 (Public Law 96-193) and 14 CFR Part 150 are in compliance with applicable requirements. The FAA also announces that it is reviewing a proposed noise compatibility program that was submitted for Fort Worth Spinks Airport under Part 150 in conjunction with the noise exposure map, and that this program will be approved or disapproved on or before August 12, 1995.

EFFECTIVE DATE: The effective date of the FAA's determination on the noise exposure maps and of the start of its review of the associated noise compatibility program is February 13, 1995. The public comment period ends April 14, 1995.

FOR FURTHER INFORMATION CONTACT: Mike Nicely, DOT/FAA, Texas Airport Development Office, 2601 Meacham Boulevard, Fort Worth, TX 76193-0653. Comments on the proposed noise compatibility program should also be submitted to the above office.

SUPPLEMENTARY INFORMATION: This notice announces that the FAA finds that the noise exposure maps submitted for Fort Worth Spinks Airport are in compliance with applicable requirements of Part 150, effective February 13, 1995. Further, FAA is reviewing a proposed noise compatibility program for that airport which will be approved or disapproved on or before August 12, 1995. This notice also announces the availability of this program for public review and comment.

Under section 103 of Title I of the Aviation Safety and Noise Abatement Act of 1979 (hereinafter referred to as "the Act"), an airport operator may submit to the FAA noise exposure maps which meet applicable regulations and which depict noncompatible land uses as of the date of submission of such maps, a description of projected aircraft operations, and the ways in which such operations will affect such maps. The Act requires such maps to be developed

in consultation with interested and affected parties in the local community, government agencies, and persons using the airport.

An airport operator who has submitted noise exposure maps that are found by FAA to be in compliance with the requirements of Federal Aviation Regulations (FAR) Part 150, promulgated pursuant to Title I of the Act, may submit a noise compatibility program for FAA approval which sets forth the measures the operator has taken or proposes for the reduction of existing noncompatible uses and for the prevention of the introduction of additional noncompatible uses.

The City of Fort Worth submitted to the FAA on February 3, 1995 noise exposure maps, descriptions and other documentation which were produced from November 1991 to January 1995 during the development of the Fort Worth Spinks Airport FAR Part 150 Airport Noise Compatibility Plan. It was requested that the FAA review this material as the noise exposure maps, as described in section 103(a)(1) of the Act, and that the noise mitigation measures, to be implemented jointly by the airport and surrounding communities, be approved as a noise compatibility program under section 104(b) of the Act.

The FAA has completed its review of the noise exposure maps and related descriptions submitted by the City of Fort Worth. The specific maps under consideration are Exhibits 10.1 and 10.2 in the submission. The FAA has determined that these maps for Fort Worth Spinks Airport are in compliance with applicable requirements. This determination is effective on February 13, 1995. FAA's determination on an airport operator's noise exposure maps is limited to a finding that the maps were developed in accordance with the procedures contained in appendix A of FAR Part 150. Such determination does not constitute approval of the applicant's data, information or plans, or a commitment to approve a noise compatibility program or to fund the implementation of that program.

If questions arise concerning the precise relationship of specific properties to noise exposure contours depicted on a noise exposure map submitted under section 103 of the Act, it should be noted that the FAA is not involved in any way in determining the relative locations of specific properties with regard to the depicted noise contours, or in interpreting the noise exposure maps to resolve questions concerning, for example, which properties should be covered by the provisions of section 107 of the Act. These functions are inseparable from

the ultimate land use control and planning responsibilities of local government. These local responsibilities are not changed in any way under Part 150 or through FAA's review of noise exposure maps. Therefore, the responsibility for the detailed overlaying of noise exposure contours onto the map depicting properties on the surface rests exclusively with the airport operator which submitted those maps, or with those public agencies and planning agencies with which consultation is required under section 103 of the Act. The FAA has relied on the certification by the airport operator, under § 150.21 of FAR Part 150, that the statutory required consultation has been accomplished.

The FAA has formally received the noise compatibility program for Fort Worth Spinks Airport, also effective on February 13, 1994. Preliminary review of the submitted material indicates that it conforms to the requirements for the submittal of noise compatibility programs, but that further review will be necessary prior to approval or disapproval of the program. The formal review period, limited by law to a maximum of 180 days, will be completed on or before August 12, 1995.

The FAA's detailed evaluation will be conducted under the provisions of 14 CFR Part 150, § 150.33. The primary considerations in the evaluation process are whether the proposed measures may reduce the level of aviation safety, create an undue burden on interstate or foreign commerce, or be reasonably consistent with obtaining the goal of reducing existing noncompatible land uses and preventing the introduction of additional noncompatible land uses. Interested persons are invited to comment on the proposed program with specific reference to these factors. All comments, other than those properly addressed to local land use authorities, will be considered by the FAA to the extent practicable. Copies of the noise exposure maps, the FAA's evaluation of the maps, and the proposed noise compatibility program are available for examination at the following locations:

Federal Aviation Administration, Texas
Airport Development Office, 2601
Meacham Boulevard, Suite 697, Fort
Worth, TX 76193-0653

Mr. A.M. Rivera, Director of Airport
Systems, City of Fort Worth, 4201
North Main Street, Fort Worth, TX
76106-2736.

Question may be directed to the individual named above under the heading, **FOR FURTHER INFORMATION CONTACT**.

Issued in Fort Worth, Texas on February 13, 1995.

Otis T. Welch,

Manager, Texas Airport Development Office.

[FR Doc. 95-5421 Filed 3-3-95; 8:45 am]

BILLING CODE 4910-13-M

FAA Approval of Noise Compatibility Program; Fort Worth Meacham Airport; Fort Worth, TX

AGENCY: Federal Aviation Administration, DOT.

ACTION: Notice.

SUMMARY: The Federal Aviation Administration (FAA) announces its findings on the noise compatibility program submitted by the city of Fort Worth under the provisions of Title I of the Aviation Safety and Noise Abatement Act of 1979 (Public Law 96-193) and 14 CFR Part 150. These findings are made in recognition of the description of Federal and nonfederal responsibilities in Senate Report No. 96-52 (1980). On August 11, 1994, the FAA determined that the noise exposure maps submitted by the city of Fort Worth under Part 150 were in compliance with applicable requirements. On February 7, 1995, the Administrator approved the Fort Worth Meacham Airport noise compatibility program. Most of the recommendations of the program were approved. No program elements relating to new or revised flight procedures for noise abatement were proposed by the city of Fort Worth.

EFFECTIVE DATE: The effective date of the FAA's approval of the Fort Worth Meacham Airport noise compatibility program is February 7, 1995.

FOR FURTHER INFORMATION CONTACT: Mike Nicely, DOT/FAA, Texas Airport Development Office, 2601 Meacham Boulevard, Fort Worth, Texas 76193-0653, (817) 222-5606. Documents reflecting this FAA action may be reviewed at this same location.

SUPPLEMENTARY INFORMATION: This notice announces that the FAA has given its overall approval to the noise compatibility program for Fort Worth Meacham Airport, effective February 7, 1995.

Under section 104(a) of the Aviation Safety and Noise Abatement Act of 1979 (hereinafter referred to as "the Act"), an airport operator who has previously submitted a noise exposure map may submit to the FAA a noise compatibility program which sets forth the measures taken or proposed by the airport operator for the reduction of existing non-compatible land uses and prevention of additional non-compatible

land uses within the area covered by the noise exposure maps. The Act requires such programs to be developed in consultation with interested and affected parties including local communities, government agencies, airport users, and FAA personnel.

Each airport noise compatibility program developed in accordance with Federal Aviation Regulations (FAR) Part 150 is a local program, not a Federal program. The FAA does not substitute its judgment for that of the airport proprietor with respect to which measures should be recommended for action. The FAA's approval or disapproval of FAR Part 150 program recommendations is measured according to the standards expressed in Part 150 and the Act and is limited to the following determinations:

a. The noise compatibility program was developed in accordance with the provisions and procedures of FAR Part 150;

b. Program measures are reasonably consistent with achieving the goals of reducing existing non-compatible land uses around the airport and preventing the introduction of additional non-compatible land uses;

c. Program measures would not create an undue burden on interstate or foreign commerce, unjustly discriminate against types or classes of aeronautical uses, violate the terms of airport grant agreements, or intrude into areas preempted by the Federal Government; and

d. Program measures relating to the use of flight procedures can be implemented within the period covered by the program without derogating safety, adversely affecting the efficient use and management of the navigable airspace and air traffic control systems, or adversely affecting other powers and responsibilities of the Administrator prescribed by law.

Specific limitations with respect to FAA's approval of an airport noise compatibility program are delineated in FAR Part 150, section 150.5. Approval is not a determination concerning the acceptability of land uses under Federal, state, or local law. Approval does not by itself constitute an FAA implementing action. A request for Federal action or approval to implement specific noise compatibility measures may be required, and an FAA decision on the request may require an environmental assessment of the proposed action. Approval does not constitute a commitment by the FAA to financially assist in the implementation of the program nor a determination that all measures covered by the program are eligible for grant-in-aid funding from the

FAA. Where federal funding is sought, requests for project grants must be submitted to the Federal Aviation Administration, Texas Airport Development Office, 2601 Meacham Boulevard, Fort Worth, Texas 76193-0650.

The city of Fort Worth submitted to the FAA on August 4, 1994, the noise exposure maps, descriptions, and other documentation produced during the noise compatibility planning study conducted from November 1991 through July 1994. The Fort Worth Meacham Airport noise exposure maps were determined by the FAA to be in compliance with applicable requirements on August 11, 1994. Notice of this determination was published in the **Federal Register** on August 18, 1994.

The Fort Worth Meacham Airport study contains a proposed noise compatibility program comprised of actions designed for phased implementation by airport management and adjacent jurisdictions from the date of study completion beyond the year 1998. It was requested that the FAA evaluate and approve this material as a noise compatibility program as described in section 104(b) of the Act. The FAA began its review of the program on August 11, 1994, and was required by a provision of the Act to approve or disapprove the program within 180 days (other than the use of new flight procedures for noise control). Failure to approve or disapprove such program within the 180-day period shall be deemed to be an approval of such program.

The submitted program contained twelve proposed actions for noise mitigation on and off the airport. The FAA completed its review and determined that the procedural and substantive requirements of the Act and FAR Part 150 have been satisfied. The overall program, therefore, was approved by the Administrator effective February 7, 1995.

Outright approval was granted for nearly all of the specific program elements.

The following program element was partially approved:

a. Aircraft maintenance runup procedures.

Development of a run-up pad and encouraging its use are *approved*. Designation of engine run-up locations is within the discretion of the airport operator and may be added to the airport rules and regulations and instituted at any time provided that they do not limit Stage 2 or Stage 3 operations so as to qualify as an airport noise and access restriction or create an
